

Documentation

Step 1:

Login into the linux lab server. This can be done with putty.

Step 2:

Make sure the all customer text files are in the same folder as the mac.cpp program

In the cmd line enter:

```
g++ mac.cpp
```

Followed by:

```
./a.out
```

A prompt will ask for a K-value, enter the value of interest. Then a full table of results will appear for all 10 customers
